The Southern Tier Associated Boards of Basketball Officials are proud to dedicate our 2016-17 Handbook to Harry Ehrie.

Harry enters his 40th season as a member of STABBO and was elected vice president in 1996. He would later assume the position of president which he has held since 1997. His 20 years in the position have made him the longest serving president in board history.

Harry's leadership has been a tremendous asset to STABBO and is proven by his long tenure as president. His demeanor and ability to relate and talk to people has provided a steady, consistent approach both on and off the court. Harry is constantly working to improve the board for officials, players, coaches and administrators. He was actively involved in the creation of the Stars and Stripes Classic and has served on scholarship committees for both STABBO and his lacrosse chapter.

His officiating career has been long and successful, officiating high school and college contests in not just basketball, but also lacrosse and soccer. His basketball resume includes multiple Section IV finals, intersectional games, and Stop-DWI Tournament Finals. Harry has also worked Section IV finals in lacrosse and soccer to go along with three NYSPHSAA lacrosse finals, including one in 2016.

Harry has long been involved in his community, volunteering his time as the Montrose Post 154 Legion baseball coach for more than 20 years. He served as a Little League board member in Montrose and was instrumental in the building of a new Little League field at Post Pond. He has also been involved in the Montrose 4th of July parade as the "Street Sweeper" for more than 20 years.

Harry is married to his wonderful and immensely patient wife, Lori. Their son Ryan, works as a college athletic director and is also a basketball official. Harry also enjoys spending time with his three beautiful grandchildren. His oldest son Craig, lives in Arizona with his granddaughter, Hope. Ryan lives in Drums, Pa. with his wife Natalie, and their two children, Emma and Hudson.

We thank Harry for his work and devotion to both the region's scholastic athletics and our basketball official's fraternity.

President's Message

I was giving some thought to what I would have been doing the past 40 years if I wasn't officiating. Maybe I would have found something else for recreation in my leisure time.

Leisure is "considered constructive time free of obligations and is viewed as activities that one engages in during this free time. Leisure as an activity encompasses the activities that we engage in for reasons as relaxation, competition and growth."

Leisure as a state of mind "considers an individual's perception of an activity as is perceived through competence, positive effect, motivation and freedom. And that individual's ability to choose the activity to participate in is not influenced by external factors and experience results in personal feelings of satisfaction, enjoyment and gratification." (1)

"Perceived competence refers to skills we believe we possess and whether these skill levels are in line with the degree of our challenge, inherent to our experience based on the success of satisfactory participation." (1) A positive effect in our choice of Leisure gives us a sense of control which brings enjoyment.

Play is imaginative, non-serious, freely chosen and actively engaging. One doesn't need to be a child to play but adult play usually has rules and regulations.

"Recreation is when we engage in an activity, like sports, music, travel, crafts, that we enjoy and has socially redeeming values and qualities and is morally acceptable and contributes to society. In recreation, the specific activity is less important than the reason for performing the activity. The desired outcome of our recreational pursuit helps balance our lives and refreshes ourselves from everyday life." (1)

We see recreation as a social instrument because of its contribution to society. After all, recreational programs assist to help produce socially desirable outcomes such as fitness and development of our youth.

My son, Ryan, comparing sports and play: "when I am on the court I am freed from my hopes, fears, dreams and personal dilemmas. The crowd noise is there, but I am so focused that they become nothing more than static. I can feel a chill up my spine. I referee because it is PLAY to me. It relaxes me, and I have a passion for it. It doesn't feel like work, nor has it ever, and the day it begins to feel that way, I hope I will take a step back and reevaluate my goals."(2)

I have come to realize after 40 years of officiating that I have been playing all this time.

You're doing what you love to do, enjoy it!

Thank you for letting me serve as your President.

Harry Ehrie

Re: NFHS Concussion Rule

This memo is to serve as a clarification of the NFHS Concussion Rule, effective for the 2010-2011 school year, for the sports that use the NFHS rules.

The NFHS Concussion Rule states, *“Any athlete who exhibits signs, symptoms or behaviors consistent with a concussion (such as loss of consciousness, headaches, dizziness, confusion or balance problems) shall be immediately removed from the contest and shall not return to play until cleared by an appropriate health-care professional”*. The NFHS emphasizes in the concussion rule that coaches and officials are NOT expected to “diagnose” a concussion. This is the responsibility of the appropriate health-care professional.

The responsibility for observing signs, symptoms, and behaviors that are consistent with a concussion is shared by both sport officials and school officials. The following protocol should be followed if any signs, symptoms or behaviors are observed.

Sport official: Remove the athlete from the contest. The official is NOT responsible for the sideline evaluation or the management of the athlete once they have been removed from the game. The official does not have to receive any paper work clearing the player to return to the game.

School official: The athlete needs to be evaluated by an appropriate health care provider. The athlete may return to play if the appropriate health care provider has determined that the athlete has NOT suffered a concussion. The athlete MAY NOT return if an appropriate health care provider is not available. The NFHS and NYSPHSAA recommend that any athlete that suffers a concussion should not return to play the day of the injury.

The NFHS and NYSPHSAA have developed many resources to help school officials, sport officials, parents, and students learn more about concussion management. A concussion DVD, sideline cards, and other useful materials can be found on the NYSPHSAA website (www.nysphsaa.org). A cost free concussion management course can be found on the NFHS website (www.nfhslearn.com).

We have included a list of possible signs, symptoms, and behaviors that can be observed by sport officials and school officials. We have also included for school officials a recommended return to play protocol. We encourage anyone that has questions or concerns to contact the NYSPHSAA office or the Section Concussion Management Team.

SIGNS, SYMPTOMS, AND BEHAVIORS OF A POSSIBLE HEAD TRAUMA

1. Problems in Brain Function

- a. Confused state** – Dazed look, vacant stare, and confusion about what happened or is happening.
- b. Memory problems** – Can't remember assignment on play, opponent, score of game, or period of the game. Can't remember how or with whom he or she traveled to the game, what he or she is wearing, what was eaten for breakfast etc.
- c. Symptoms reported by athlete** – Headache, nausea, or vomiting, blurred or double vision, oversensitivity to sound, light or touch, ringing in the ears, feeling foggy or groggy.
- d. Lack of sustained attention** – Difficulty sustaining focus adequately to complete a task or a coherent thought or conversation.

2. Speed of Brain Function: Slow response to questions, slow slurred speech, incoherent speech, slow body movements, slow reaction time.

3. Unusual Behaviors: Behaving in a combative, aggressive or very silly manner, or just atypical for the individual. Repeatedly asking the same question over and over. Restless and irritable behavior with constant motion and attempts to return to play or leave. Reactions that seem out of proportion and inappropriate. Changing position frequently and having trouble resting or finding a comfortable position. These can be manifestations of post-head trauma difficulties.

4. Problems with Balance and Coordination: Dizzy, slow, clumsy movements, inability to walk a straight line or balance on one foot with eyes closed.

Recommended Return to Play Protocol

Day 1: No exertional activity until medically cleared and asymptomatic for 24 hours.

Day 2: Begin low-impact activity such as walking, stationary bike, etc.

Day 3: Initiate aerobic activity fundamental to specific sport such as skating, running, etc.

Day 4: Begin non-contact skill drills specific to sport such as dribbling, ground balls, batting, etc.

Day 5: Full contact in practice setting

If the athlete remains without symptoms, he or she may return to play.

Special note: Athlete must remain asymptomatic to progress to next day.
If symptoms return, the athlete must return to the previous level.
Medical check should occur before contact.
